

## 2017 Yough River fishing updates

---

- **5-06-2017** Heavy rain has the Yough flowing high and muddy. We caught fish before the rise should be a week or so before it is back down to normal.
- **4-11-2017** After some heavy rains and high water the river is starting to drop slowly.
- **03-21-2017** The water temperature is going up after a long cold spell and the smallies are starting to eat.
- **03-08-2017** Recent rain has the river up flowing muddy water temps are in the 40s.

- **02-22-2017** The recent warm weather has got the Smallmouth chomping on 412 Baits on the Youghiogheny River. You can find them at <http://412baitco-com.3dcartstores.com/>
- **02-19-2017** Water level is a bit high water is greenish color water temperatures are on a steady rise.
- **02-10-2017** Water levels are running high and muddy. [A recent oil spill in Connellsville.](#)
- **02-02-2017** The river is around normal for this time of year excluding the ice water temps 38 degrees
- **01-16-2017** The river is flowing fast and high with water temps at 36
